

Safety

LAW Inspection Services Inc. has a certified safety program and procedures manual and are confident that all requirements for safety are met every time a crew is dispatched to the field.

All LAW technicians have current safety training in H2S, First Aid, WHIMIS, and TDG.

At LAW, safety comes first, and this is evident through our Certificate of Recognition with Occupational Health and Safety's Partnership in Safety program that we implement on a daily basis.

Maintaining exceptional safety procedures allows us to reduce the probability of accidents at a work site, thus improving work place safety practices.
